

How to make a tippy tap?

Step 1 What you need to make the tippy tap:

Step 2 Clean the bottle well

Step 3

Heat the wire over the lit candle. Make a small hole in the lower part of the bottle.

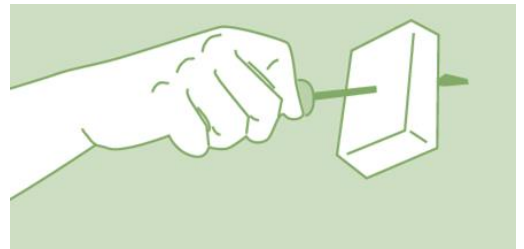

Step 4

Push the plastic tube through the hole of the bottle, the tube should fit tightly.

Step 5

Push the hole through the soap with the screwdriver

Fill the bottle with clean water and replace the cap
When the cap is tight, no water should flow through the tube
When the cap is loose, the water should flow out in a stream from the tube

Step 6

When you are sure it works, hang/place it where people can use it for hand washing. Keep soap nearby, by threading the soap through a string and tie it to the bottle.

WASH YOUR HANDS!
